The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every

major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.

Following in the tracks of the author's well-known Alfa DOHC tuning manual, Jim Kartalamakis describes all kinds of useful information and techniques to increase power, performance and reliability of V6 Alfas and their engines. This book is the result of much research and firsthand experience gained through many projects concerning Alfa V6 rear-wheel drive models, from the GTV6 series to the last of the 75 3.0 models. A wealth of completely new information can be found here regarding cylinder head mods, big brake mods, LSD adjustment procedure, suspension modifications for road and track, electrical system improvements, flowbench diagrams, dyno plots, and much more!

A small investment in this book could save you a fortune. With the aid of this book's step-by-step expert guidance, you'll discover all the information you need to know about the Alfa Romeo Giulia GT Coupe you want to buy. Unique point system will help you to place the car's value in relation to condition. This is an important investment-don't buy a car without this book's help.

Packed with information on stripping and rebuilding, tuning, jetting, and choke sizes. Application formulae help you calculate exactly the right setup for your car. Covers all Weber DCOE & Dellorto DHLA & DCO/SP carburetors.

These important Sports Racing cars of 1967-1977 won the 1975 and 1977 Manufacturers World Championships. The definitive record, this is also the first book to be written about the history and development of Alfa Romeo's fabulous Championship-winning Tipo 33 prototypes. Containing many previously unseen photographs and interviews with key personalities, this is a vital addition to any Alfa enthusiasts collection.

Includes entries for maps and atlases.

Buying a car is an expensive business and mistakes can prove costly. Wouldn't it be great if you could take an expert with you? With the aid of this book's step-by-step guidance from a marque specialist, you can! The unique points system will help to place the car's value in relation to condition while extensive photographs illustrate the problems to look out for.
