Canadian Geography: A Scholarly Bibliography is a compendium of published works on geographical studies of Canada and its various provinces. It includes works on geographical studies of Canada as a whole, on multiple provinces, and on individual provinces. Works covered include books, monographs, atlases, book chapters, scholarly articles, dissertations, and theses. The contents are organized first by region into main chapters, and then each chapter is divided into sections: General Studies, Cultural and Social Geography, Economic Geography, Historical Geography, Physical Geography, Political Geography, and Urban Geography. Each section is further sub-divided into specific topics within each

main subject. All known publications on the geographical studies of Canada—in English, French, and other languages—covering all types of geography are included in this bibliography. It is an essential resource for all researchers, students, teachers, and government officials needing information and references on the varied aspects of the environments and human geographies of Canada.

This volume represents the result of almost two decades of trans-Atlantic collaborative development of a policy research paradigm, the International Comparative Rural Policy Studies program. Over this period dozens of scientists from different disciplines but with a common interest in rural issues and policy have collaboratively

studied the policies in North America, Europe, and other parts of the world. A core element of the book is the idea and practice of comparative research and analysis – what can be learned from comparisons, how and why policies vary in different contexts, and what lessons might or might not be “transferable” across borders. It provides skills for the use of comparative methods as important tools to analyze the functioning of strategies and specific policy interventions in different contexts and a holistic approach for the management of resources in rural regions. It promotes innovation as a tool to valorize endogenous resources and empower local communities and offers case studies of rural policy in specific contexts. The book largely adopts a territorial approach to rural policy. This means the book is more interested in rural regions, their people and economies, and in the policies that affect them, than in

rural sectors, and sectoral policies per se. The audience of the book is by definition international and includes students attending courses in agricultural and rural policy, rural and regional studies, and natural resource management; lecturers seeking course material and case studies to present to their students in any of the courses listed above; professionals working in the field of rural policy; policy-makers and civil servants at different levels seeking tools to better understand rural policy both at the local and global scale and to better recognize and comprehend how to transfer best practices.

Invoking theories of popular culture, film, literature, drama, and tourism, contributors probe the emotional attachment and loyalty of

Social Policy and Practice in Canada: A History traces the history of social policy in Canada from the period of First Nations' control to the present day, exploring the various ways in which residents of the area known today as Canada have organized themselves to deal with (or to ignore) the needs of the ill, the poor, the elderly, and the young. This book is the first synthesis on social policy in Canada to provide a critical perspective on the evolution of social policy in the country. While earlier work has treated each new social program as a major advance, and reacted with shock to neoliberalism's attack on social programs, Alvin Finkel demonstrates that right-wing and left-wing forces have always battled to shape social policy in Canada. He argues that the notion of a welfare state consensus in

the period after 1945 is misleading, and that the social programs developed before the neoliberal counteroffensive were far less radical than they are sometimes depicted. *Social Policy and Practice in Canada: A History* begins by exploring the non-state mechanisms employed by First Nations to insure the well-being of their members. It then deals with the role of the Church in New France and of voluntary organizations in British North America in helping the unfortunate. After examining why voluntary organizations gradually gave way to state-controlled programs, the book assesses the evolution of social policy in Canada in a variety of areas, including health care, treatment of the elderly, child care, housing, and poverty.

When Newfoundland entered the Canadian Confederation in 1949,

it was hoped it would promote greater unity between the Maritime provinces, as Term 29 of the Newfoundland Act explicitly linked the region's economic and political fortunes. On the surface, the union seemed like an unprecedented opportunity to resurrect the regional spirit of the Maritime Rights movement of the 1920s, which advocated a cooperative approach to addressing regional underdevelopment. However, Newfoundland's arrival did little at first to bring about a comprehensive Atlantic Canadian regionalism. *Inventing Atlantic Canada* is the first book to analyse the reaction of the Maritime provinces to Newfoundland's entry into Confederation. Drawing on editorials, government documents, and political papers, Corey Slumkoski examines how each Maritime province used the addition of a new provincial cousin to fight underdevelopment. Slumkoski also details the rise of regional

cooperation characterized by the Atlantic Revolution of the mid-1950s, when Maritime leaders began to realize that by acting in isolation their situations would only worsen.

Whether it is wildfires in Alberta, widespread flooding in Newfoundland, or massive snowstorms in Nova Scotia, Canadian governments must be prepared to manage a range of emergencies. Many organizations and resources have to be coordinated in emergency management, and the quality of emergency planning has a direct impact on the effectiveness of disaster response. Municipalities have primary responsibility, but emergency management requires authority and resources from all levels of government as well as collaboration with stakeholders from the private and voluntary sectors. Drawing on extensive documentary

evidence and many interviews with government officials and stakeholders, *Multilevel Governance and Emergency Management in Canadian Municipalities* provides a comprehensive assessment of the structure and dynamics of emergency management in Canada. Contributors analyze the role of the federal government, compare policies and governance in three different provinces, and examine approaches to emergency planning in thirteen municipalities of varying sizes. In addition to describing political and legal frameworks, essays investigate how emergency management policies are shaped by the relationships between municipal, provincial, and federal officials, as well as with social interests that are concerned about planning for emergencies. Contributors also assess the quality of emergency management. Despite the growing importance of emergency management, there has been little

comparative research on Canadian policy making in this field.

Multilevel Governance and Emergency Management in Canadian Municipalities provides insights into how governments have readied themselves for emergencies and how they can better prepare.
