Boxing Plato's Shadow Flashcards

The allegory of the cave, or Plato's Cave, is an allegory presented by the Greek philosopher Plato in his work Republic (514a – 520a) to compare "the effect of education () and the lack of it on our nature".It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter.The allegory is presented after the analogy of the sun (508b – 509c ...

Designed to introduce students to the academic discipline of Communication, this text describes the scope and methods of communication studies, and sketches its history from the work of the early sophists to contemporary research efforts. Boxing Plato ' s Shadow helps explain why, despite its long and venerable history of scholarly endeavor, Communication continues to struggle for recognition of its legitimate place in the academy. Throughout, the authors emphasize the field's durability over more than two millennia and the merits of multiple systematic approaches to the study of communication.

Designed to introduce students to the academic discipline of Communication, this brief, supplementary text describes the scope and methods of Communication Study, and sketches its history from the work of the early sophists to contemporary research efforts. The authors address the subject inclusively, arguing that Communication Study is a sound social science, a humanity, and a practical art. Discussions of methods are balanced, including quantitative and qualitative social science, and modern and postmodern critical approaches. The book helps explain why, despite its long and venerable history of scholarly endeavor, Communication continues to struggle for recognition of its legitimate place in the academy. Throughout, the authors emphasize the field's durability over more than two millennia and the merits of multiple systematic approaches to the study of communication. This book serves well in introductory Communication courses, and (as an overview) in methodology courses, and may also be useful for beginning graduate students as an orientation to the discipline.

In 50 Ways to Understand Communication, Arthur Asa Berger familiarizes readers with important concepts written by leading communication and cultural theorists, such as Saussure, LZvi-Strauss, de Certeau, McLuhan, Postman, and many others. Organized in fifty short segments, this concise guide covers a wide range of important ideas from psychoanalysis and semiology to humor, 'otherness,' and nonverbal communication. Berger's clear explanations surround this assortment of influential writing. This engaging, accessible book is essential for students of communication and anyone interested in how we communicate in a world of rapidly changing media.

A Networked Self examines self presentation and social connection in the digital age. This collection brings together new work on online social networks by leading scholars from a variety of disciplines. The focus of the volume rests on the construction of the self, and what happens to self-identity when it is presented through networks of social connections in new media environments. The volume is structured around the core themes of identity, community, and culture — the central themes of social network sites. Contributors address theory, research, and practical implications of many aspects of online social networks including self-presentation, behavioral norms, patterns and routines, social impact, privacy, class/gender/race divides, taste cultures online, uses of social networking sites within organizations, activism, civic engagement and political impact.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- Updated in its 3rd edition, Human Communication in Society is the only text to explore the interplay between the individual and society and its impact on communication. By understanding how the tensions among individual forces, societal forces, cultures, and contexts shape communication and meaning, readers become more ethical and effective communicators. Alberts, Nakayama, and Martin wrote Human Communication in Society to bring a comprehensive, balanced view to the study of human communication.

A lively dialogue between a foreign philosopher and a powerful statesman reflects the essence of Platonic reasoning on political theory and practice. It also embodies the philosopher's practical ideas about a utopian republic.

This volume provides researchers and students with a discussion of a broad range of methods and their practical application to the study of non-state actors in international security. All researchers face the same challenge, not only must they identify a suitable method for analysing their research question, they must also apply it. This volume prepares students and scholars for the key challenges they confront when using social-science methods in their own research. To bridge the gap between knowing methods and actually employing them, the book not only introduces a broad range of interpretive and explanatory methods, it also discusses their practical application. Contributors reflect on how they have used methods, or combinations of methods, such as narrative analysis, interviews, qualitative comparative analysis (QCA), case studies, experiments or participant observation in their own research on non-state actors in international security. Moreover, experts on the relevant methods discuss these applications as well as the merits and limitations of the various methods in use. Research on non-state actors in international security provides ample challenges and opportunities to probe different methodological approaches. It is thus particularly instructive for students and scholars seeking insights on how to best use particular methods for their research projects in International Relations (IR), security studies and neighbouring disciplines. It also offers an innovative laboratory for developing new research techniques and engaging in unconventional combinations of methods. This book will be of much interest to students of non-state security actors such as private military and security companies, research methods, security studies and International Relations in general.

Written around 380 BC, The Republic work is an important contribution to the age old question of how to best structure a society in a just way. Presented in the form of a dialogue between Socrates and three different interlocutors, it is an enquiry into the notion of a perfect community and the ideal individual within it. It is considered Plato's best-known work and has proven to be one of the most intellectually and historically influential works of philosophy and political theory. One of the most important books ever written on the subject of philosophy and political theory. An essential read for any student of philosophy or political science.

Philosophy goes to the Movies is a new kind of introduction to philosophy that makes use of movies including The Matrix, Antz, Total Recall and Cinema Paradiso, to explore philosophical ideas. Topics covered include: *the theory of knowledge *the self and personal Identity *moral philosophy *social and political philosophy *philosophy of science and technology *critical thinking. Ideal for the beginner, this book guides the student through philosophy using lively and illuminating cinematic examples. It will also appeal to anyone interested in the philosophical dimensions of cinema.
