Canon lenses and most third-party lenses give you the option of switching to manual focus. To manually focus the lens, follow these steps: Move the Focus switch to MF. On most lenses, you'll find this switch on the left side when the camera is facing your subject.

### How to Manually Focus Your Canon EOS 6D - dummies

Canon introduced STM autofocus lenses primarily to resolve an issue that their previous Ultrasonic motors could not: smooth autofocus when shooting video. In still photography, focus occurs before the image is shot, so that how the motor gets to focus is not as big a concern.
