Celebrating the fortieth anniversary of this seminal book, this new edition includes an illuminating foreword by Carlos Eire and Ronald K. Rittges The seeds of the swift and sweeping religious movement that reshaped European thought in the 1500s were sown in the late Middle Ages. In this book, Steven Ozment traces the growth and dissemination of dissenting intellectual trends through three centuries to their explosive burgeoning in the Reformations—both Protestant and Catholic—of the sixteenth century. He elucidates with great clarity the complex philosophical and theological issues that inspired antagonistic schools, traditions, and movements from Aquinas to Calvin. This masterly synthesis of the intellectual and religious history of the period illuminates the impact of late medieval ideas on early modern society. With a new foreword by Carlos Eire and Ronald K. Rittgers, this modern classic is ripe for rediscovery by a new generation of students and scholars.

The question of why people act against their better judgment has always been prominent in philosophy. Risto Saarinen presents the first study of ideas about weakness of the will between 1350 and 1650. He shows how the understanding of human conduct and free will changed in this formative period between medieval times and modernity.

This volume unites a collection of articles which illustrate brilliantly the complexity of European cultural history in the Renaissance. On the one hand, scholars of this period were inspired by classical narratives on the sublime effects of music and, on the other hand, were affected by the profound religious upheavals which destroyed the unity of Western Christianity and, in so doing, opened up new avenues in the world of music. These articles offer as broad a vision as possible of the ways of thinking about music which developed in the fifteenth and sixteenth centuries.

In this compilation of essays, experts in the field provide an in-depth look at the long-lasting impact of the Protestant Reformation. This collection of essays by twenty-one distinguished American historians reflects on a peculiarly American way of imagining the past. At a time when history-writing has changed dramatically, the authors discuss the birth and evolution of historiography in this country, from its origins in the late nineteenth century through its present, more cosmopolitan character. In the book's first part, concerning recent historiography, are chapters on exceptionalism, gender, economic history, social theory, race, and immigration and multiculturalism. Authors are Daniel Rodgers, Linda Kerber, Naomi Lamoreaux, Dorothy Ross, Thomas Holt, and Philip Gleason. The three American centuries are discussed in the second part, with chapters by Gordon Wood, George Fredrickson, and James Patterson. The third part is a chronological survey of non-American histories, including that of Western civilization, ancient history, the middle ages, early modern and modern Europe, Russia, and Asia. Contributors are Eugen Weber, Richard Saller, Gabrielle Spiegel, Anthony Molho, Philip Benedict, Richard Kagan, Keith Baker, Joseph Zizak, Volker Berghahn, Charles Maier, Martin Malia, and Carol Gluck. Together, these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world. Formerly writing from a conviction that America had a singular destiny, American historians have gradually come to share viewpoints of historians in other countries about which they write. The result is the virtual disappearance of what was a distinctive American voice. That voice is the subject of this book.
