Automotive Drive Belt, Tensioner & Pulley Guide - Dayco

Remove the bolt used to put the initial tension on the belt and replace the plug where the crankshaft timing pin was inserted and tighten to 25Nm. After replacing the timing belt cover, fit a new Dayco auxiliary belt, idler, tensioner and crankshaft pulley, tightening the latter to 40Nm + 110°.

Dayco offers advice on timing belt installation | techtalk.ie

Why replace the timing belt alone? Worn or wearing tensioners, pulleys and idlers can cause a new timing belt to fail in a very short time. A timing belt failure can result in costly engine damage. Dayco® Timing Belts, when replaced in conjunction with the tensioner, idler Pulley and oil seals, restore the optimum operating conditions for the timing drive system. All Dayco timing kit components meet or exceed OEM specifications.
