In the fall of 1978 Ray Ordorica packed everything he thought he would need into his Toyota LandCruiser and drove north to Alaska. He came to a land he had never seen, to find something he wasn't even sure existed: a wilderness cabin he could use for a year or more to live, think, relax, read, and write. Ordorica found his cabin, fixed it up, and, although it was just an un-insulated 12- by 16-foot one-room log structure, he spent three winters in it in relative comfort. Ordorica ' s life in that cabin fulfilled a dream he had had for more than ten years. During his long winters in Alaska, it occurred to him that there must be many others who have put off an extended wilderness visit to out of ignorance or fear. They have as many questions about Alaska as he had before he arrived: How do you cope with 40 below? How do you get water? Is it totally dark in mid-winter? These questions and many more gave Ordorica the idea to write the Alaskan Retreater ' s Notebook, an epic memoir about one man ' s journey into the Alaskan wilderness. With his wisdom, you will learn how to live with the country, and not against it.

Over the last 30 years, the 'technical' or armed pick-up truck has become arguably the most ubiquitous military land vehicle of modern warfare. Harking back to the armed Jeeps and Chevrolet trucks of the SAS and Long Range Desert Group in North Africa in World War II, the world's first insurgent technicals were those of the Sahrawi People's Liberation Army in Algeria in the late 1970s, followed by the Chadian use of technical in the so-called Toyota War against Libya. Since then, technicals have seen use in Somalia, Iraq, Afghanistan and Libya, as well as being used by Western and Russian Special Forces. Fully illustrated with commissioned artwork and providing rigorous analysis, this is the first history of how this deceptively simple fighting vehicle has been used and developed in conflicts worldwide.
