Global supply chains connect the world in unprecedented and intricate ways. Geopolitics, Supply Chains, and International Relations in East Asia dissects the sources and effects of contemporary disruptions of these networks. Despite their dramatic expansion as distinct, complex, and unique mechanisms of economic interdependence, the role of supply chains in broader patterns of interstate conflict and cooperation has been relatively neglected. This volume sheds light on whether a highly interdependent “Factory Asia” and Asia-Pacific can withstand geopolitical, geo-economic, and pandemic threats. This combustible mix, fueled by rising hyper-nationalism in the US and China, threatens to unleash sizable disruptions in the global geography of production and in the international relations of East Asia.

This book constitutes the refereed proceedings of the 10th International Conference on Blended Learning, ICBL 2017, held in Hong Kong, China, in June 2017.
