Probability
The theoretical

File Type PDF

Holt Theoretical

probability is 8.3%
and the experimental
probability is 4%.

Although the
experimental
probability is slightly
lower, this is not a
significant difference.

In most experiments,
the theoretical
probability and
experimental
probability will not
be equal; however,

Probability and ...

Theoretical

probability is what
we expect to happen,
where experimental
probability is what
actually happens
when we try it out.

The probability is still
calculated the same
way, using the
number of possible

File Type PDF Holt Theoretical

ways an outcome can occur divided by the total number of outcomes. As more trials are conducted, the experimental probability generally gets closer to the theoretical probability.
