meet a set of needs. Mobile app development requires both engineering design and product design. Engineering design focuses on physics, such as speed, mass and other performance measures while product design also considers user and consumers by asking what the user wants in a product.

1 Introduction to Design and the Concept Development Process  
An introduction to Design Thinking starts by placing the human experience — what people want, need, and value — at the center of your design thinking. As opposed to optimizing for other metrics or stakeholders, like product speed, financial profits, or aesthetics, the design thinking process starts by prioritizing the primal needs of the

Week #1: Introduction to Design. This  
module was designed to introduce you  
to the design process and to reinforce  
the critical role that user needs play in  
good design. You'll learn that design is  
conceiving and giving form to artifacts  
that solve problems, and also how to  
recognize and identify a gap in a  
problem.

Network of Educators

Introduction: The word "design" has various meanings. But, in relation to the subject concern, it is a pattern or an outline of research project's workings. It is the statement of essential elements of a study that provides basic guidelines of conducting the project. It is same as the blue print of architect's work.
