Impoverished young Americans had no greater champion during the Depression than Eleanor Roosevelt. As First Lady, Mrs. Roosevelt used her newspaper columns and radio broadcasts to crusade for expanded federal aid to poor children and teens. She was the most visible spokesperson for the National Youth Administration, the New Deal's central agency for aiding needy youths, and she was adamant in insisting that federal aid to young people be administered without discrimination so that it reached blacks as well as whites, girls as well as boys. This activism made Mrs. Roosevelt a beloved figure among poor teens and children, who between 1933 and 1941 wrote her thousands of letters describing their problems and requesting her help. Dear Mrs. Roosevelt presents nearly 200 of these extraordinary documents to open a window into the lives of the Depression's youngest victims. In their own words, the letter writers confide what it was like to be needy and young during the worst economic crisis in American history. Revealing both the strengths and the limitations of New Deal liberalism, this book depicts an administration concerned and caring enough to elicit such moving appeals for help yet unable to respond in the very personal ways the letter writers hoped.

Skills for Scholars Math provides children in grade 5 with necessary math instruction. Offering 80 pages of full-color activities, perforated pages, easy-to-follow direction, and complete answer key, children will have fun learning important math skills. Want to develop better math skills when working with word problems? This updated edition can help anyone who wants to improve scores, supplement a current course of study, or brush up on basic problem-solving skills before taking a standardized math test. 501 Math Word Problems provides what people need most to improve their basic math skills quickly and effectively-practice! Gaining familiarity with this specific question type is a proven technique for increasing test scores. This book allows the student to implement a step-by-step approach to each math word problem encountered, avoiding the possibilities for careless mistakes. The format makes this book a valuable study tool for the SAT, GRE, GMAT, and other standardized tests.

58 color reproducible graphic organizers to help your students comprehend any book or piece of literature in a visual way. Our graphic organizers enable readers to see how ideas fit together, and can be used to identify the strengths and weaknesses of your students' thought processes. Our graphic organizers are essential learning tools that will help your students construct meaning and understand what they are reading. They will help you observe your students' thinking process on what you read as a class, as a group, or independently, and can be used for assessment. They include: Story Maps, Plot Development, Character Webs, Predicting Outcomes, Inferencing, Foreshadowing, Characterization, Sequencing Maps, Cause-Effect Timelines, Themes, Story Summaries and Venn Diagrams.

From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

An eleven-year-old shoots a stray cat with his new air rifle, subsequently suffers from guilt, and eventually assumes responsibility for it.
