Maya stelae (singular stela) are monuments that were fashioned by the Maya civilization of ancient Mesoamerica. They consist of tall, sculpted stone shafts and are often associated with low circular stones referred to as altars, although their actual function is uncertain. Many stelae were sculpted in low relief, although plain monuments are found throughout the Maya region.

When the Maya kings of Tikal dedicated their first carved monuments in the third century A.D., inaugurating the Classic period of Maya history that lasted for six centuries and saw the rise of such famous cities as Palenque, Copan and Yaxchilan, Maya civilization was already nearly a millennium old. Its first cities, such as Nakbe and El Mirador, had some of the largest temples ever raised in Prehispanic America, while others such as Cival showed even earlier evidence of complex rituals. The reality of this Preclassic Maya civilization has been documented by scholars over the past three decades: what had been seen as an age of simple village farming, belatedly responding to the stimulus of more advanced peoples in highland Mesoamerica, is now know to have been the period when the Maya made themselves into one of the New World's most innovative societies. This book discusses the most recent advances in our knowledge of the Preclassic Maya and the emergence of their rainforest civilization, with new data on settlement, political organization, architecture, iconography and epigraphy supporting a contemporary theoretical perspective that challenges prior assumptions.

Ancient Maya comes to life in this new holistic and theoretical study.

From the author of Guns, Germs and Steel, Jared Diamond's Collapse: How Societies Choose to Fail or Survive is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's Collapse uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's Collapse also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economis 'This book shines like all Diamond's work' - Sunday Times

Experience daily life in Maya civilization, from its earliest beginnings to the Spanish conquest in the 16th century. Narrative chapters describe Mayan political life, economy, social structure, religion, writing, warfare, and scientific methods. Readers will explore the Mayan calendar, counting system, hunting and gathering methods, language, and family roles and relationships. A revised and expanded edition based on the latest archaeological research, this volume offers new interpretations and corrects popular misconceptions, and shows how the Maya adapted to their environment and preserved their culture and language over thousands of years. Over 60 photos and illustrations, several of new archaeological sites, enhance the material, and an expanded resource center bibliography includes web sites and DVDs for further study. The closing chapter discusses what Maya civilization means for us today and what we can learn from Maya achievements and failures. A first-stop reference source for any student of Latin American and Native American history and culture.

Thanks to powerful innovations in archaeology and other types of historical research, we now have a picture of everyday life in the Mayan empire that turns the long-accepted conventional wisdom on its head. * Includes numerous illustrations and drawings plus depictions of important artifacts such as the murals of Bonampak and the hieroglyphic stairway of Copan * Provides detailed maps of major Maya cities as well as other research sites

Reveals the parallels between the rise and fall of Atlantis, cultures in ancient Mesoamerica, and our modern civilization Links the demise of Atlantis with the birth of the Olmec civilization in Mexico, the beginning of the first Egyptian dynasty, and the start of the Mayan Calendar Reveals the Atlantean and Mayan prophecy of an eternal cycle of global creation, destruction, and renewal and how we are headed into a destructive phase Shows how ancient prophecies correlate precisely with the latest climatology studies, the rising incidence of solar flares, and papers from Pentagon and NASA analysts With the passing of the Mayan Calendarʼs end date we can now focus on the true significance of what the Maya and their predecessors were trying to convey to future civilizations. Frank Joseph reveals how the Mayan prophecy, symbolized by their calendar, was created through the combined genius of Atlantis and Lemuria and predicts an eternal cycle of global creation, destruction, and renewal. He shows how this cycle correlates precisely with scientific studies on glacial ice cores and predictions from the Hopi, the Incas, and the Scandinavian Norse as well as the visions of Edgar Cayce. He links the demise of Atlantis with the birth of the Olmec civilization in Mexico (the progenitors of the Maya), the beginning of the first Egyptian dynasty, and the start of the Mayan Calendar. Drawing on the latest climatology studies and papers from Pentagon and NASA analysts, he reveals that we are on the brink of a destructive phase in the global cycle of change as predicted by the Atlanteans and the Maya. The worldʼs current political, economic, and cultural deterioration is paralleled by unprecedented storms and record temperatures, massive solar flares, tectonic disturbances, and fissuring sea floors that could release dangerous reservoirs of methane gas into the environment--all of which signals we are headed into another ice age. Despite the Atlanteansʼ greater understanding of the cyclical nature of catastrophes and of the human role in them, Joseph reveals the mistakes they made that played a crucial role in their civilizationʼs destruction. By recognizing the self-destructive patterns of Atlantis in our own civilization, we can learn from their mistakes to reestablish civilizationʼs cosmic balance before time runs out.

The rich findings of recent exploration and research are incorporated in this completely revised and greatly expanded sixth edition of this standard work on the Maya people. New field discoveries, new technical advances, new successes in the decipherment of Maya writing, and new theoretical perspectives on the Maya past have made this new edition necessary.
