show Sealife believe they have found a ratings bonanza. For a director dying for drama, a distress call from Henders Island—a mere blip on any radar—might be just the ticket. Until the first scientist sets foot on Henders—and the ultimate test of survival begins. For when they reach the island's shores, the scientists are utterly unprepared for what they find—creatures unlike any ever recorded in natural history. This is not a lost world frozen in time; this is Earth as it might have looked after evolving on a separate path for half a billion years—a fragment of

a lost continent, with an ecosystem that could topple ours like a house of cards.

Deep beneath the Ural Mountains, in an underground city carved out by slave labor during the darkest hours of the Cold War, ancient caverns hold exotic and dangerous life-forms that have evolved in isolation for countless millennia. Cut off from the surface world, an entire ecosystem of bizarre subterranean species has survived undetected—until now. Biologists Nell and Geoffrey Binswanger barely survived their last encounter with terrifying,

invasive creatures that threatened to engulf the planet. They think the danger is over until a ruthless Russian tycoon lures them to his underground metropolis, where they find themselves confronted by a vicious menagerie of biological horrors from their past—and by entirely new breeds of voracious predators. Now they're rising up from the bowels of the Earth to consume the world as we know it. USA Today praised Warren Fahy's debut novel, *Fragment*, as "a rollicking tale [that] will enthrall readers of Jurassic Park and The Ruins." Now Fahy sets

NOTE: CRIMSON is a novel that I began as a child. Embarking on my lifelong career as an author at a tender age, I wrote the first 75 pages in tiny print in a small notepad that I carried with me in my pocket everywhere I went.

Unfortunately, my mom threw my pants into the washing machine, and all that was left was a lump of Papier-mâché. I was crushed and found myself at what would be the most significant crossroads of my life.

Should I rewrite it—or just give up? I rewrote it. Four years later I finished it, my first novel. In 3 months, it will have been 40 years

since I first began writing it, finishing it finally to my adult satisfaction just before reaching that anniversary. It missed being published by a hair when I was 16, with a long apologetic and encouraging letter from Random House, the publisher who would publish my first novel, FRAGMENT, so many years later after jobs flipping burgers, managing a bookstore, at a publishing company, as a word processor, an editor, a managing editor, a database designer, a videogame writer and a robot script writer—all of which I used as my substitutes for

college, which financial situations had prevented me from attending. And all the while, I updated, revised, improved and added to CRIMSON. Absent from the first draft was any sign of romance; that needed time and interest to add in subsequent years. I never compromised on how big this novel should be, and it constantly raised my game and challenged me. This is the novel I cut my teeth on, and I am proud to finally put my name on it now. More than a testament of my own personal and professional journey as an author, however, I think you will enjoy it. In fact, after 40

Marco Polo was nicknamed "Marco of the millions" because his Venetian countrymen took the grandiose stories of his travels to be exaggerated, if not outright lies. As he lay dying, his priest, family, and friends offered him a last chance to confess his mendacity, and Marco, it is said, replied "I have not told the half of what I saw and did." Now, in his new novel *The Journeyer*, Gary Jennings has imagined the half that Marco left unsaid as even more elaborate and adventurous than the tall

tales thought to be lies. From the palazzi and back streets of medieval Venice to the sumptuous court of Kublai Khan, from the perfumed sexuality of the Levant to the dangers and rigors of travel along the Silk Road, Marco meets all manner of people, survives all manner of danger, and, insatiably curious, becomes an almost compulsive collector of customs, languages and women. In more than two decades of travel, Marco was variously a merchant, a warrior, a lover, a spy, even a tax collector - but always a journeyer, unflagging in his appetite for new

experiences, regretting only what he missed. Here - recreated and reimagined with all the splendor, the love of adventure, the zest for the rare and curious that are Jennings's hallmarks - is the epic account, at once magnificent and delightful, of the greatest real-life adventurer in human history. that finally reveal the truth about one of the world's great religions. Christianity was born out of the cataclysmic conflict between the Roman Empire and messianic Jews that culminated in two bitter wars fought during the 1st and 2nd Centuries. The Romans not only reduced the legendary Jerusalem Temple to a Wailing Wall, they grafted their imperial rule onto the religion of the vanquished, as well--just as they had done with other conquered cultures. Inherited from an era of tyranny, war and deliberate religious fraud, the New Testament was created for a

long-forgotten purpose: the pacification of messianic rebels. After 30 years of research, authors James S. Valliant and Warren Fahy present irrefutable archaeological and textual evidence that proves Christianity was created by the Roman state with arguments that break new ground in Christian scholarship while providing a clear and definitive voice to a growing new understanding of Christian origins--one that is destined to change the way the world looks at religion forever.
