Michael Chenault, award-winning investigative journalist with the New York Times, is rousted in the middle of the night by NYPD detectives and accused of the bizarre murder of a complete stranger. After clearing himself, Chenault finds that Martin Koplanski, the retired history professor he'd been accused of murdering, was likely killed for a mysterious Mormon relic long thought to be just a myth. Twenty-four hours later, Chenault receives an email with a photo of the recently murdered wife of Presidential candidate, Brockston Ratchford. She too appears to have been ritually killed in the exact manner as Koplanski, right down to having the same cryptic character scrawled in blood across her forehead. With way more than just a hunch to now go on, Chenault heads out to Salt Lake City, the site of the Ratchford murder investigation, to find out what, if any, connection there is between the murders. With the help of a beautiful young reporter he meets along the way, Chenault comes to learn the dark family secrets of a rising political star, along with the rather strange but true history of the Mormon church. As he pieces the story together of what appears to be an ever-growing conspiracy, Chenault is pursued by The Brothers, two murderous zealots who will stop at nothing to retrieve the Mormon relic Chenault is also trying to find. What Chenault eventually discovers is that what he's uncovered may not only affect the outcome of the next Presidential election, but decide the fate of an entire religion-if he can manage to stay alive. In the tradition of Raymond Khoury, Brad Meltzer, Dan Brown and Steve Berry, The Moroni Deception is a cleverly conceived, twisting tale of political and religious intrigue by a new master of the conspiracy thriller.

A profound and in-depth dialog of Spirit-guided insights describing the nature of the soul essence and presenting imaginative, practical tools to transform human dramas.Addressing commonly asked questions, Opening a Window to the Soul presents a unique way to understand how the world operates, heal painful emotions, get along with difficult people, and clear unhealthy patterns. With potent examples from the author's personal journey as well as client sessions, the messages are compassionate, enlightening and universally applicable.Topics include: the nature of the soul essence; what's between lives; soul memories, emotions, ego, and creative thought as aspects of the ðEarth Suit;ð how past life experiences impact present time; the soul family as relating to childhood and karmic agreements; love relationships and soul mates; working with the Spirit team (soul family guides) and soul purpose.

ABOUT THIS BOOK: This book is written to show how God uses faithful people who lived on the earth and then died and was resurrected or was translated without tasting death as His Angels and messengers to accomplish His purposes. Such was the case with Noah who became the Angel Gabriel and was sent to deliver messages to Daniel, Zacharias and Mary, the mother of Jesus. This book is also written to show that Ancient Prophets who held special keys, authority and power on earth and in heaven was chosen to come back to earth and confer and restore those keys and power to servants of God in these latter days. That this is the dispensation of the fullness of times preparing the world for the Second Coming of Jesus Christ.

This extraordinary book explains the engine that has catapulted the Internet from backwater to ubiquity—and reveals that it is sputtering precisely because of its runaway success. With the unwitting help of its users, the generative Internet is on a path to a lockdown, ending its cycle of innovation—and facilitating unsettling new kinds of control. iPods, iPhones, Xboxes, and TiVos represent the first wave of Internet-centered products that can't be easily modified by anyone except their vendors or selected partners. These "tethered appliances" have already been used in remarkable but little-known ways: car GPS systems have been reconfigured at the demand of law enforcement to eavesdrop on the occupants at all times, and digital video recorders have been ordered to self-destruct thanks to a lawsuit against the manufacturer thousands of miles away. New Web 2.0 platforms like Google mash-ups and Facebook are rightly touted—but their applications can be similarly monitored and eliminated from a central source. As tethered appliances and applications eclipse the PC, the very nature of the Internet—its "generativity," or innovative character—is at risk. The Internet's current trajectory is one of lost opportunity. Its salvation, Zittrain argues, lies in the hands of its millions of users. Drawing on generative technologies like Wikipedia that have so far survived their own successes, this book shows how to develop new technologies and social structures that allow users to work creatively and collaboratively, participate in solutions, and become true "netizens."

Three of CouchDB's creators show you how to use this document-oriented database as a standalone application framework or with high-volume, distributed applications. With its simple model for storing, processing, and accessing data, CouchDB is ideal for web applications that handle huge amounts of loosely structured data. That alone would stretch the limits of a relational database, yet CouchDB offers an open source solution that's reliable, scales easily, and responds quickly. CouchDB works with self-contained data that has loose or ad-hoc connections. It's a model that fits many real-world items, such as contacts, invoices, and receipts, but you'll discover that this database can easily handle data of any kind. With this book, you'll learn how to work with CouchDB through its RESTful web interface, and become familiar with key features such as simple document CRUD (create, read, update, delete), advanced MapReduce, deployment tuning, and more. Understand the basics of document-oriented storage and manipulation Interact with CouchDB entirely though HTTP using its RESTful interface Model data as self-contained JSON documents Handle evolving data schemas naturally Query and aggregate data in CouchDB using MapReduce views Replicate data between nodes Tune CouchDB for increased performance and reliability

Set in Africa with footholds in archaic Ethiopia and once resplendent Ethiopia, this compelling story describes WHY Christianity is exploding in Africa and below the equator. The book details staggering predictions for religion in Africa and the entire world. Not only are the spiritually aware finding Him, but He is rallying the skeptical and lost with visions and dreams and a dedicated missionary force that attest to the reality of modern-day revelation and a loving God who wants His children home. Seen through the eyes of a reluctant lady missionary, this is a humorous story of Sondra who initially rejects a calling to serve in Africa with her husband, incorrectly describing the continent as "backwards, with endless desert, hyenas lying dead in mud holes and Zulus that are still angry" and declares she is not going. Akin to Jonah who landed in the whale's belly or the struggling archetypal hero, the recalcitrant missionary ultimately discovers the amazing and enterprising ways that the Lord spreads his Restored Gospel and what part she plays in it.
