Discover the cognitive tools that lead to creative thinking and problem-solving with this [well-written and easy-to-follow] guide (Library Journal). Explore the [thinking tools] of extraordinary people, from Albert Einstein and Jane Goodall to Mozart and Virginia Woolf, and learn how you can practice the same imaginative skills to become your creative best. With engaging narratives and examples, Robert and Michèle Root-Bernstein investigate cognitive tools such as observing, recognizing patterns, modeling, playing, and more. Sparks of Genius is [a clever, detailed and demanding fitness program for the creative mind] and a groundbreaking guidebook for anyone interested in imaginative thinking, lifelong learning, and transdisciplinary education (Kirkus Reviews). [How different the painter at the easel and the physicist in the laboratory! Yet the Root-Bernsteins recognize the deep-down similarity of all creative thinking, whether in art or science. They demonstrate this similarity by comparing the accounts that various pioneers and inventors have left of their own creative processes: for Picasso just as for Einstein, for Klee just as for Feynman, the creative impulse always begins in vision, in emotion, in intuition. . . . With a lavishly illustrated chapter devoted to each tool, readers quickly realize just how far the imagination can stretch.] [Booklist] A powerful book . . . Sparks of Genius presents radically different ways of approaching problems. [American Scientist

Plumbing the experiences of a wide range of "geniuses" for lessons in creative thought, the authors probe the lives and work of Albert Einstein, Richard Feynman, e.e. cummings, Isabel Allende, and others for clues about the creative process.

In this bold book, Robert and Michele Root-Bernstein vividly describe how geniuses from Albert Einstein and Richard Feynman to e.e. cummings and Isabel Allende use a common toolbox of mental skills to create new ideas and expressions in every area of the arts and sciences. Illustrations, photos.

How can parents, educators, business leaders and policy makers nurture creativity, prepare for inventiveness and stimulate innovation? One compelling answer, this book argues, lies in fostering the invention of imaginary worlds, a.k.a. worldplay. First emerging in middle childhood, this complex form of make-believe draws lifelong energy from the fruitful combustions of play, imagination and creativity. Unfortunately, trends in modern life conspire to break down the synergies of creative play with imaginary worlds. Unstructured playtime in childhood has all but disappeared. Invent-it-yourself make-believe places have all but succumbed in adolescence to ready-made computer games. Adults are discouraged from playing as a waste of time with no relevance to the workplace. Narrow notions of creativity exile the fictive imagination to fantasy arts. And yet, as Michele Root-Bernstein demonstrates by means of historical inquiry, quantitative study and contemporary interview, spontaneous worldplay in childhood develops creative potential, and strategic worldplay in adulthood inspires innovations in the sciences and social sciences as well as the arts and literature. Inventing imaginary worlds develops the skills society needs for inventing the future. For more on Inventing Imaginary Worlds, check out: www.inventingimaginaryworlds.com

Explains how to ignite innate creativity and free thought processes through the discovery of hidden connections among familiar things

Kristine Barnett's son Jacob has an IQ higher than Einstein's, a photographic memory, and he taught himself calculus in two weeks. At nine he started working on an original theory in astrophysics that experts believe may someday put him in line for a Nobel Prize, and at age twelve he became a paid researcher in quantum physics. But the story of Kristine's journey with Jake is all the more remarkable because his extraordinary mind was almost lost to autism. At age two, when Jake was diagnosed, Kristine was told he might never be able to tie his own shoes. The Spark is a remarkable memoir of mother and son. Surrounded by [experts] at home and in special ed who tried to focus on Jake's most basic skills and curtail his distracting interests!moving shadows on the wall, stars, plaid patterns on sofa fabric!Jake made no progress, withdrew more and more into his own world, and eventually stopped talking completely. Kristine knew in her heart that she had to make a change. Against the advice of her husband, Michael, and the developmental specialists, Kristine followed her instincts, pulled Jake out of special ed, and began preparing him for mainstream kindergarten on her own. Relying on the insights she developed at the daycare center she runs out of the garage in her home, Kristine resolved to follow Jacob's [spark]'s passionate interests. Why concentrate on what he couldn't do? Why not focus on what he could? This basic philosophy, along with her belief in the power of ordinary childhood experiences (softball, picnics, s'mores around the campfire) and the importance of play, helped Kristine overcome huge odds. The Barnetts were not wealthy people, and in addition to financial hardship, Kristine herself faced serious health issues. But through hard work and determination on behalf of Jake and his two younger brothers, as well as an undying faith in their community, friends, and family, Kristine and Michael prevailed. The results were beyond anything anyone could have imagined. Dramatic, inspiring, and transformative, The Spark is about the power of love and courage in the face of overwhelming obstacles, and the dazzling possibilities that can occur when we learn how to tap the true potential that lies within every child, and in all of us. Praise for The Spark [An] amazing memoir . . . compulsive reading. [The Washington Post] The Spark is about the transformative power of unconditional love. If you have a child who's [different]and who doesn't?you won't be able to put it down. [Sylvia Nasar, author of A Beautiful Mind] Love, illness, faith, tragedy and triumph!is all here. . . . Jake Barnett's story contains wisdom for every parent. [Newsday] This eloquent memoir about an extraordinary boy and a resilient and remarkable mother will be of interest to every parent and/or educator hoping to nurture a child's authentic [spark. [Publishers Weekly] Compelling. . . Jake is unusual, but so is his superhuman mom. [Booklist] The Spark describes in glowing terms the profound intensity with which a mother can love her child. [Andrew Solomon, author of The Noonday Demon and Far from the Tree] Every parent and teacher should read this fabulous book! [Temple Grandin, author of Thinking in Pictures and co-author of The Autistic Brain

This is a volume of essays and reviews that delightfully explores mathematics in all its moods **from the light and the witty, and humorous to serious, rational, and cerebral.** These beautifully written articles from three great modern mathematicians will provide a source for supplemental reading for almost any math class. Topics include: logic, combinatorics, statistics, economics, artificial intelligence, computer science, and broad applications of mathematics. Readers will also find coverage of history and philosophy, including discussion of the work of Ulam, Kant, and Heidegger, among others.

The extraordinary memoir of a mother's love, commitment and nurturing, which allowed her son, originally diagnosed with severe autism, to flourish into a universally recognized genius--and how any parent can help their child find their spark. Today, at 13, Jacob is a paid researcher in quantum physics, working on extending Einstein's theory of relativity. Diagnosed at 1 with severe autism, at 3 he was assigned to life-skills classes and his parents were told to adjust their expectations. The goal: tying his own shoes at 16. Kristine's belief in the power of hope and the dazzling possibilities that can occur when we keep our minds open and learn to fuel a child's true potential changed everything.

Was Andy Warhol a hoarder? Did Einstein have autism? Was Frank Lloyd Wright a narcissist? In this surprising, inventive, and meticulously researched look at the evolution of mental health, acclaimed health and science journalist Claudia Kalb gives readers a glimpse into the lives of high-profile historic figures through the lens of modern psychology, weaving groundbreaking research into biographical narratives that are deeply embedded in our culture. From Marilyn Monroe's borderline personality disorder to Charles Darwin's anxiety, Kalb provides compelling insight into a broad range of maladies, using historical records and interviews with leading mental health experts, biographers, sociologists, and other specialists. Packed with intriguing revelations, this smart narrative brings a new perspective to one of the hottest new topics in today's cultural conversation.
