IEC 61850-Based Smart Substations: Principles, Testing, Operation and Maintenance systematically presents principles, testing approaches, and the operation and maintenance

technologies of such substations from the perspective of real-world application. The book consists of chapters that cover a review of IEC 61850 based smart substations, substation configuration technology, principles and testing technologies for the smart substation, process bus, substation level, time setting and synchronization, and cybersecurity. It gives detailed information on testing processes and approaches, operation and maintenance technologies, and insights gained through practical experience. As IEC 61850 based smart substations have played a significant role in smart grids, realizing information sharing and device interoperability, this book provides a timely resource on the topics at hand. Contributes to the overall understanding of standard IEC 61850, analyzing principles and features Introduces best practices derived from hundreds of smart substation engineering applications Summarizes current research and insights gained from practical experience in the testing, operation and maintenance of smart substation projects in China Gives systematic and detailed information on testing technology Introduces novel technologies for next-generation substations

A provocative contribution to the debate on the nature of the state and political processes in Africa.

We revisit Lipset's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

The Best of News Design 32nd Edition, the latest edition in Rockport's highly respected series, presents the winning entries from the Society for News Design's 2011 competition. Featuring work selected by a panel of judges from more than 14,000 international publication entries, this inspirational volume sets the bar for excellence in journalistic design. Bold, full-color layouts feature the best-of-the-best in news, features, portfolios, visuals, and more, and each entry is accompanied by insightful commentary on the elements that made the piece a standout winner. Every industry professional aspires to one day see his or her work in this book.

This book reviews and interprets the literature that examines the design of regulatory policy when the regulator's knowledge of the relevant environment is limited. It will be useful to professional economists wishing to keep up with the development of their science.

This little book contains some of the greatest wisdom literature of the ages. Everyone, and especially young people, should be familiar with it. Both Epicureanism and Stoicism taught that if we want to be happy and productive, we must strengthen and train our willful and wayward minds. There are echoes of the Buddha's Dhammapada. The passages selected are both beautiful and moving.
