1-866-468-5767 International
Point of Sale 201-928-0222 555
Cedar Lane Teaneck, Our Store
Site New Jersey 07666. This
document will show you how to
program your Motorola Symbol
LS2208 scanner to read barcodes
the way they are formatted in your
Corner Store POS database. Most
of your products have UPC-A
barcodes that have 12 digits with
10 digits in the middle, one in the
front and one at the end.

The SYMBOL LS2208 barcode scanner is not programmed out-of-the-box to perform a carriage return function after each scan. A carriage return (aka enter key) is generally needed to bring the cursor down after each scan or (in certain POS software and inventory applications) to bring a cursor to the next data field. A carriage return function will increase overall scanning productivity for any POS or inventory system and is normally a required functionality for most users.
