Pendant Specifications

Teach pendants are designed
to control the robot through
a teach-and-repeat
technique, where the
operator uses the teach
pendant to program the robot

Online Library Teaching Pendant Specifications

for a specific task, range of motion, or speed. The operator uses the controls on the robot pendant to provide the robot with information about speed, delay times, and execution of specific functions as well as to define the robot's physical relationship with the other machinery that may be involved in the process.
