Following a baseball game that nearly became a religious war, two Jewish boys become friends. Danny comes from the strict Hasidic sect that keeps him bound in centuries of orthodoxy. Reuven is brought up by a father patently aware of the twentieth century. Everything tries to destroy their friendship, but they use honesty with each other as a shield and it proves an impenetrable protection.

In a passionate, energetic narrative, *The Promise* brilliantly dramatizes what it is to master and use knowledge to make one's own way in the world. Reuven Malter lives in Brooklyn, he's in love, and he's studying to be a rabbi. He also keeps challenging the strict interpretations of his teachers, and if he keeps it up, his dream of becoming a rabbi may die. One day, worried about a disturbed, unhappy boy named Michael, Reuven takes him sailing and cloud-watching. Reuven also introduces him to an old friend, Danny Saunders—now a psychologist with a growing reputation. Reconnected by their shared concern for Michael, Reuven and Danny each learns what it is to take on life—whether sacred truths or a troubled child—according to his own lights, not just established authority.

A fascinating history of the Jews, told by a master novelist, here is Chaim Potok's fascinating, moving four thousand-year history. Recreating great historical events, exploring Jewish life in its infinite variety and in many eras and places, here is a unique work by a singular Jewish voice.

Gershon Loran, a quiet rabbinical student, is troubled by the dark reality around him. He sees

hope in the study of Kabbalah, the Jewish book of mysticism and visions, truth and light. But to Gershon's friend, Arthur, light means something else, the Atom bomb, his father helped create. Both men seek different a refuge in a foreign place, hoping for the same thing....

An overview of the work features a biographical sketch of the author, a list of characters, a summary of the plot, and critical and analytical views of the work.

This book constitutes the refereed proceedings of the 31st International Symposium on Mathematical Foundations of Computer Science, MFCS 2006. The book presents 62 revised full papers together with the full papers or abstracts of 7 invited talks. All current aspects in theoretical computer science and its mathematical foundations are addressed, from algorithms and data structures, to complexity, automata, semantics, logic, formal specifications, models of computation, concurrency theory, computational geometry and more.

The theory of adaptive control is concerned with construction of strategies so that the controlled system behaves in a desirable way, without assuming the complete knowledge of the system. The models considered in this comprehensive book are of Markovian type. Both partial observation and partial information cases are analyzed. While the book focuses on discrete time models, continuous time ones are considered in the final chapter. The book provides a novel perspective by summarizing results on adaptive control obtained in the Soviet Union, which are not well known in the West. Comments on the interplay between

Acces PDF The Chosen Chaim K

the Russian and Western methods are also included.

The story of two fathers and two sons and the pressures on all of them to pursue the religion they share in the way that is best suited to each. And as the boys grow into young men, they discover in the other a lost spiritual brother, and a link to an unexplored world that neither had ever considered before. In effect, they exchange places, and find the peace that neither will ever retreat from again.

David Lurie learns that all beginnings are hard. He must fight for his place against the bullies in his Depression-shadowed Bronx neighborhood and his own frail health. As a young man, he must start anew and define his own path of personal belief that diverges sharply with his devout father and everything he has been taught.... From the Paperback edition.
