Buy this book if: you are a high school student; you are in college; you want to learn how to use your Ti-84 Plus CE quickly and easily; you don't want to read a 300+ page book about how to write programs on your calculator. Why is it so easy to understand the Ti-84 CE with this book? Short and easy to understand explanations of each topic. I don't spend a whole page talking about how to use one key. I've kept it short and concise. Images of the real calculator keys between the text. So, for instance, when I say "Press [GRAPH] and use the arrow keys [...]" the book shows the real buttons. This makes it super easy to follow the steps on your calculator. Beside the flowing text, I found it more useful to provide you with some simple keystroke sequences for some calculations. Look at it, and you instantly know how to do it - it's that simple! Lots of screenshots to give you real examples. This book is your perfect buddy for these calculator models: Ti-84 Plus C Ti-84 Plus C Silver Edition Ti-84 Plus CE These calculators have a color display. If you have an older calculator with a black and white display like the Ti-84 Plus or Ti-83 Plus, this book is not for you. However, I have written another book just for the older calculators. I decided to write two books so I can show you exactly the right screenshots and keys that apply to the individual calculator model you have (most other books just use a similar calculator to make one book for all models). About the Author My name is

Marco and I graduated from high school in 2013. I was quite good at mathematics and often helped my classmates to understand it better - especially how to use their calculators. It just has been a few years since I was using the TI-84 Plus myself. Therefore, I know how students think and what they need. I know they don't need a book with more than 300 pages to understand a graphing calculator. While writing my book, I kept in mind that it should be simple to understand and as short as possible so as not to confuse students with too much background information. Besides that, I remembered that even if I previously knew how something worked, I often forgot the keystroke to do it. So I created simple step-by-step keystroke sequences for most commands and calculations, which makes it so easy to look them up and instantly be able to do it - with no need to read through a long text. After I graduated, I developed an app that teaches how to use the TI-84 Plus CE. My app is helping a lot of students use their calculators and is frequently ranked in the Top 10 Education USA on iOS and Android.
